

PRESS RELEASE

Participation of Sovtest ATE in ExpoElectronica 2010

Sovtest ATE will take part in the leading Russian and East Europe international exhibition of technological equipment and materials for production of electronics and electrotechnical devices, which will take part on the 20-22 of April 2010 in Moscow (in the greatest Russian exhibition center CrocusExpo).

The company will demonstrate its main in-house developments:

- Fault locator on a component level
- Wire harness and PCB tester
- X-Ray system
- SMD mounting system
- Dry box
- Vibration system
- Fuel cell

Some purchased equipment will be also demonstrated there.

ExpoElectronica is an International Specialized Exhibition for the Technology Equipment and Materials for the Electronic and Electrical Industry and for electronic components and technological equipment. This is a unique exhibition project, having no analogues, which resulted from the marketing research revealing the huge demand for such kind of event. Year in, year out, the exhibition stably increases in show size, number of exhibitors - both Russian and international, and range of exhibits.

Main topics of the exhibition this year are:

- Test and measurement, quality assurance
- Industrial equipment (Materials, tools, furniture)
- Materials processing
- Semiconductor / display manufacturing
- Industrial automation
- Technologies in cable processing
- Manufacturing technologies for PCBs and other circuit carriers
- Component mount technology
- Soldering technology
- Product finishing

We will be glad to see you at our booth!

20 - 22 April 2010

Crocus Expo, Moscow

Pavilion 1, Hall 2
